

MININGMINNESOTA™

RESPONSIBLE DEVELOPMENT of NATURAL RESOURCES

BECOME A MININGMINNESOTA MEMBER

STRONGER TOGETHER

MiningMinnesota is committed to benefiting our communities and advancing a sustainable future through responsible mining, processing and domestic supply chain utilization of our mineral resources.

Our coalition works with citizens, businesses and other organizations to cultivate open, positive, truthful discourse for mining in the Midwest, specifically Minnesota.

Your voice belongs here.

Not only does our state have vast quantities of the minerals needed to advance clean energy technologies, but we also have the right people and regulatory systems in place to do so responsibly.

We believe that we all have a social obligation to support the responsible development of our regional mineral resources required for a sustainable future.

We are changing the conversation about nonferrous mining in our state through education, advocacy and collaboration, and we welcome you and your organization into our coalition.

Join us and join the conversation!
